

NET232 Modbus (RTU/ASCII /TCP) Serial to Ethernet

Part No:
MPGC-Mb-TCP-NET232

Description: Need to **add 10/100 Modbus TCP Ethernet** to your product? If you have serial port using Modbus RTU/ASCII, now it can become a Modbus TCP Ethernet port with **no changes to your software.**

The **NET232 Modbus** is a simple device with software all packaged inside a simple cable. The NET232 Modbus will take your serial modbus data stream and convert it to Modbus TCP Ethernet packets with no changes to your software.

Software: The NET232 Modbus is **preloaded with Modbus firmware** and requires no changes by the customer. It maps all current serial Modbus commands and registers to Ethernet Modbus TCP commands and registers.

Specifications:

- Local or Worldwide Ethernet 10/100M or Internet Connection
- Modbus Serial baud rates (2400, 4800, 9600, 19.2k, 38.4k, ...115.2K)
- Ethernet activity, Power LED's
- DB9 12" molded cable DTE (male), female adapter included
- Included AC Power adapter, 500mA @ 9VDC
